

INSTRUCTIONS FOR THE CORRECT COMPLETION OF THE RESEARCH PROPOSAL

A) Legitimate purpose of the research:

Describe the subject of the scientific research/study and the reason why the requested confidential data is necessary for its conduct.

B) Research body that commissions the research, or requests access to the data (in the case of a legal entity):

If the scientific research/study is conducted by a legal entity, indicate its name.

If the access applicant is not a legal entity, but he/she is a researcher conducting a scientific research/study on his/her own behalf, then the word "None" is indicated here.

C) Researcher status:

Indicate the name of the researcher who will sign the Contract and have access to the confidential data, as well as his/her professional status.

D) Persons authorized by the research institution/researcher who will have access to the data:

Indicate the names and professional statuses of any additional persons who will have access to the data, in the context of conducting the scientific research/study, with authorization from the research institution or the researcher, as the case may be.

If there are no authorized persons, then the word "None" is indicated here.

E) Method and means of access to be used:

Indicate the means to be used by the researcher and (if any) by the persons authorized by him/her who will have access to the data, for the secure storage and processing of the data (physical and logical data protection measures (regulatory, administrative, technical, organizational)), as well as the method of processing the data. Example: here it could be written that both the researcher and the authorized persons (if any) will store the data on their personal computer and will have access to them with a personal password.

F) Publishable (communicable) results of the research/study:

The requested confidential data are used exclusively for the conduct of the specific scientific research/study described above and any other use, or disclosure and provision to third parties, other than the persons who will have access and are mentioned in the research proposal, is expressly prohibited. The results of the scientific research/study arise after processing the confidential data and are publishable (communicable), provided that the confidentiality of the data to which access is granted is not compromised. Indicate the commitment of the research body or the researcher, as the case may be, that the confidential data (the purely primary data that he/she will receive from ELSTAT) to which he/she will have access will not be published/communicated, but only the results of his/her scientific research/study that will result from the processing of the confidential data should be mentioned. Describe also the format of the results of the

scientific research/study that will be published/announced by the research institution or by the researcher, as the case may be, so as to preserve the confidentiality of the data.

G) Time required to conduct the research/study:

Indicate the duration of the research or the completion time of the study and its completion date. Example: The research/study being conducted will be completed at the end of 202x or in June 202x.
