

INCOME INEQUALITY, 2020

(income reference year 2019)

INDICATORS

GINI

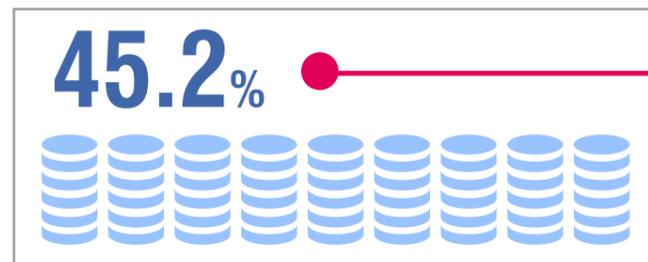

Gini coefficient is the ratio of cumulative shares of the population arranged according to the level of equivalised disposable income to the cumulative share of the total equivalised disposable income received by them. For 2020, if we choose randomly 2 persons, the difference between their income is expected to amount to 31.4% of the mean equivalised disposable income.

S80/S20

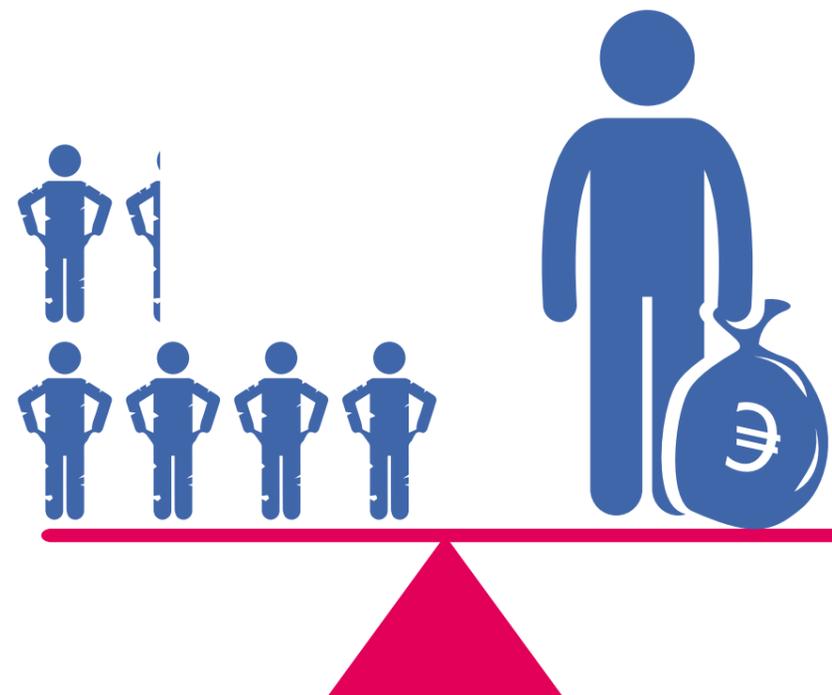

The S80/S20 income quintile share ratio is the ratio of the total of equivalised disposable income received by 20% of the country's wealthiest population to that received by 20% of the country's poorest population. In 2020 the share of the income of the wealthiest 20% of the population is 5.2 times higher than the share of the income of the poorest 20% of the population.

DISTRIBUTION OF INCOME BY QUARTILES

NATIONAL INCOME

POPULATION

THE INCOME OF THE WEALTHIEST 20% OF THE POPULATION IS 5.2 TIMES HIGHER THAN THE INCOME OF THE POOREST 20% OF THE POPULATION
