ANNOUNCEMENT

Launch of Application for Access to Standardized Scientific Use Files

The Hellenic Statistical Authority (ELSTAT) announces the launch of Application for Access to Standardized Scientific Use Files. These are microdata files of ELSTAT's statistical surveys, which have been anonymized with anonymization criteria predefined by ELSTAT and from which it is theoretically possible to indirectly identify surveyed units.

The available files and their anonymization criteria, as well as the conditions and procedure for accessing the files, are described on ELSTAT's website, at the following link: <https://www.statistics.gr/en/su-files>.
