## GREECE IN FIGURES

October - December 2025

## FOREWORD

The Hellenic Statistical Authority (ELSTAT) through the quarterly publication "Greece in figures", published in both the Greek and English languages, presents statistical data providing an updated demographic, social and economic picture of Greece in a clear and comprehensive manner.

The publication "Greece in figures" is intended for users of statistics who seek to have a comprehensive view of Greece, on the basis of the most recent statistical data. The statistical time series included in this publication are, mostly, compiled by ELSTAT. Furthermore, for comparability reasons, the publication also presents, by theme, selected tables with statistical data of EU Member States.

The publication will be updated with the most recent data on a quarterly basis and will be posted on the portal of ELSTAT on the first Wednesday of January, April, July and October.

For more information on the data and statistics provided in "Greece in figures", please contact the Division of Statistical Information and Publications of ELSTAT (tel.: +30 213 1352301, +30 213 1352021, e-mail: [data.dissem@statistics.gr](mailto:data.dissem@statistics.gr)).

We welcome any suggestions and recommendations on the content of the publication.

### 8. Demographic indicators<sup>(1)</sup>, 2020 - 2024<sup>(2)</sup>

	2020	2021	2022	2023	2024
Age dependency ratio	56.5	56.8	57.0	57.3	57.4
Ageing ratio	162.2	166.4	170.7	175.7	182.0
Mean age of mother at birth	31.6	32.0	32.0	32.1	32.2
Total fertility rate	1.4	1.4	1.3	1.3	1.3
Crude death rate	12.3	13.6	13.4	12.2	12.1
Infant mortality rate	3.2	3.5	3.1	3.5	3.8

(1) Dependency ratio: the ratio of the persons aged 0 -14 and 65 years and over to the persons aged 15 - 64 years.

Ageing ratio: the ratio of the persons aged 65 years and over to the persons aged 0 - 14 years.

Mean age of the mother at birth: it refers to all live births that were recorded during the reference year, regardless of the birth order.

Total fertility rate: the average number of living children that a woman will give birth to over the course of her lifetime (provided that during her reproductive age, the fertility conditions prevail by age of the reference year). The total fertility rate is used in order to determine the level of replacement of the generations, which, in developed countries, is considered to be 2.1.

Crude death rate: the number of deaths during the reference year per 1,000 average population of usual residents.

Infant mortality rate: the number of children dying at less than 1 year of age divided by the number of live births that year. The ratio is expressed by 1,000 live births.

(2) The demographic indicators for the years 2011-2023, except for the infant mortality rate, have been revised, as they were calculated based on the revised population time series.

(1) General Government primary balance is defined here as General Government balance (according to ESA 2010) minus interest expenditure of General Government entities to other sectors. The effect of support to financial institutions is included in this measure of the primary balance. The measure of the primary balance presented here differs from the definition of primary balance used under the Economic Adjustment Programme for Greece.

(2) Debt as defined in the Maastricht Treaty.

(3) Sign is negative when expenditures of the support exceed revenues. When the impact of the support to financial institutions is positive for the General Government balance, this is due to the fees accruing on the inter-bank lending guarantees and the bond loan scheme, and the revenues from bank preference shares being greater than the expenditures accrued.

(4) The support to the financial institutions includes the on-going revenues and expenditures associated with interventions starting from 2008.

\* = Provisional data.

(1) General Government primary balance is defined here as General Government balance (according to ESA 2010) minus interest expenditure of General Government entities to other sectors. The effect of support to financial institutions is included in this measure of the primary balance. The measure of the primary balance presented here differs from the definition of primary balance used under the Economic Adjustment Programme for Greece.

(2) Debt as defined in the Maastricht Treaty.

Note: The compilation of imports and exports of goods is based on ESTAT's trade statistics instead of the settlements data formerly used.

(1) (+) increase (-) decrease

According to the new BPM6, an increase /decrease of assets receives a positive/negative sign and an increase/decrease of liabilities receives a positive/negative sign.

(2) (+) increase (-) decrease

According to the new BPM6, an increase /decrease of reserve assets receives a positive/negative sign.

(3) Reserve assets, as defined by the ECB, only include monetary gold, the reserve position at the IMF, Special Drawing Rights, and the Bank of Greece's claims in foreign currency on residents of countries outside the euro area. Conversely, reserve assets do not include claims in euro on residents of countries outside the euro area, claims in foreign currency and in euro on residents of euro area countries, and the Bank of Greece's participation in the capital and the reserve assets of the ECB.

(1) Any kind of extraction of energy products from natural sources to a usable form is called primary production. Primary production takes place when the natural sources are exploited, for example, in coal mines, crude oil fields, hydro power plants or fabrication of biofuels. Transformation of energy from one form to another, like electricity or heat generation in thermal power plants or coke production in coke ovens, is not primary production.

(1) School expectancy corresponds to the expected years of education over a lifetime and has been calculated adding the single-year enrolment rates for all ages from the age of 5 years and over. To illustrate the meaning of school expectancy, let us take an example: school expectancy for the age of 10 would be one year, if all 10-year-old students (in the year of the data collection) were enrolled. If only 50 % of 10-year-old students were enrolled, school expectancy for the age of 10 would be half a year.

Crime statistics refer to offences committed during the year, either misdemeanors or felonies (prosecuted "ex proprio motu" or upon indictment), for which the Regional Departments of the Hellenic Police have conducted a preliminary investigation or submitted a lawsuit or indictment against the relevant offenders (principal perpetrators or accomplices). In the case of multiple offences, all the offences are stated separately and, in the case of accomplices, abettors, etc., all those who participated in the offence are stated separately.

(1) The number of offences committed refer to felonies and misdemeanor crimes, completed and attempts thereof.

(2) The ratio is estimated on the basis of the estimated population, on the 1st January of the relevant year.

(3) The total number of offenders includes the offenders who were identified in the month when the offence was registered and the offenders who were unknown during the same month and who were identified later during the year, principal offenders and accomplices, arrested or not.
