Printing Section

Dear reader,

The publication "**Greece: Sustainable Development Goals 2030**" presents the most recent statistical data for Greece concerning specific indicators on sustainable development. These indicators are primarily compiled by the Hellenic Statistical Authority (ELSTAT) within the framework of the United Nations 2030 Agenda.

The significance of the 17 Sustainable Development Goals (SDGs) for 2030 is multifaceted, as they cover a wide range of challenges. These challenges include eradicating extreme poverty and hunger, promoting quality education, health, gender equality, sustainable use of natural resources and environmental protection. Furthermore, the SDGs respond to the need for development that respects the environment, promotes sustainable use of resources and ensures the protection of our ecosystems.

The most critical factor for achieving the SDGs is the collection and analysis of reliable statistical data from the global statistical community and, primarily, from the statistical systems of all countries. Reliable statistical information provides the basis for assessing progress, monitoring inequalities, identifying issues and shaping policies that will lead to improvements, ensuring that "no one is left behind."

The publication "**Greece: Sustainable Development Goals 2030**" will be updated on the first Wednesday of each June with the latest available data. For more information, you can contact the Division of Statistical Information and Publications of ELSTAT (telephone: +30 213 135 2301, 213 135 2183, email: data.dissem@statistics.gr).

Suggestions and proposals for the content of the publication are welcome.

Athanassios Katsis
President of the Hellenic Statistical Authority

Introduction

The Sustainable Development Goals (SDGs) for 2030 are a set of 17 goals adopted in 2015 with Resolution 70/1 of the United Nations General Assembly titled "Transforming our world: the 2030 Agenda for Sustainable Development". They aim to promote global sustainable development. Through the resolution, UN member states committed to monitoring and evaluating the progress made in implementing the SDGs using a set of national, regional and global indicators. An ambitious agenda was adopted to promote integrated and sustainable development with the contribution of all countries and stakeholders.

The 2030 Agenda for the SDGs stipulates that progress reports are based on individual targets and indicators, using data primarily generated by National Statistical Systems. The 17 SDGs are broken down into a group of 169 targets for all countries and 231 indicators. The discussion on the availability of methodology, as well as the usefulness and effectiveness of statistical data for these indicators, is ongoing.

Furthermore, the United Nations Statistical Commission decided that the indicators should be based, to the maximum extent possible, on comparable and standardized official statistics provided by countries in international statistical systems. When other sources and methodologies are used, they should be reviewed and agreed upon transparently by national statistical authorities. Indicators should be disaggregated, as appropriate, by income, sex, age, race, ethnicity, migration status, disability, geographical location or other characteristics, following the Fundamental Principles of Official Statistics of the United Nations.

At European (regional) level, in December 2016, the Statistical Office of the European Union (Eurostat) proposed, in line with the 17 Sustainable Development Goals, a complementary set of indicators based on statistics already produced by the European Statistical System in full accordance with the Code of Practice for European Statistics. The EU set of indicators consists of 100 indicators and is open to annual reviews for the incorporation of indicators from new data sources, as well as for the consideration of new goals according to the priorities of the European Commission, such as the European Green Deal and other initiatives.

ELSTAT, as the coordinator of the Hellenic Statistical System (ELSS) and responsible for statistical coordination of the SDGs, has the mission to develop, produce and disseminate official statistics of Greece. Official statistics cover all sectors of public and private activity, support decision-making and are submitted to international organizations in accordance with national obligations.

ELSTAT actively participates in all methodological meetings of the statistical community and maintains continuous communication with the Custodian Agencies responsible for monitoring the indicators of the SDGs. Through this collaboration, in addition to providing statistical data, new statistical surveys and new data sources (administrative, geospatial, etc.) are explored and new variables are added to existing statistical surveys.

Moreover, ELSTAT played a crucial role in shaping, in 2019, the National Set of Indicators for Greece, where the selection of the included indicators took into account national priorities and data availability. In addition, ELSTAT prepared the statistical annexes for the Voluntary National Reports presented at the UN High-Level Political Forum (HLPF) in 2018 and 2022. Additionally, the website of ELSTAT contains a section dedicated to the Sustainable Development Goals (SDGs) as the National Reporting Platform (<http://www.statistics.gr/en/sdgs>), where users can have direct access to data for each goal and find publications and visualization tools related to the SDGs in Greece and abroad.

SUSTAINABLE DEVELOPMENT GOALS

8 Decent work and economic growth	34
9 Industry, innovation and infrastructure	40
10 Reduced inequalities	46
11 Sustainable cities and communities	48
12 Responsible consumption and production	50
13 Climate action	52
14 Life below water	54
15 Life on land	56
16 Peace, justice and strong institutions	58
17 Partnership for the Goals	60

1. No poverty

1 NO POVERTY

1.2.1 PROPORTION (%) OF POPULATION LIVING BELOW THE NATIONAL POVERTY LINE, BY SEX

1.2.1 PROPORTION (%) OF POPULATION LIVING BELOW THE NATIONAL POVERTY LINE

1.2.1 PROPORTION (%) OF POPULATION LIVING BELOW THE NATIONAL POVERTY LINE, BY AGE

GOAL 1. END POVERTY IN ALL

UNSD Indicator code	Target	Indicator
C010201	1.2 By 2030, reduce at least by half the proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions	1.2.1 Proportion (%) of population living below the national poverty line, by sex and age ⁽¹⁾
C010202		1.2.2 Proportion (%) of men, women and children of all ages living in poverty in all its dimensions according to national definitions ⁽¹⁾
C010401	1.4 By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance	1.4.1 Proportion (%) of population living in households with access to basic services ⁽¹⁾
C010a01	1.a Ensure significant mobilization of resources from a variety of sources, including through enhanced development cooperation, in order to provide adequate and predictable means for developing countries, in particular least developed countries, to implement programmes and policies to end poverty in all its dimensions	1.a.2 Proportion (%) of total government spending on essential services (education, health and social protection) ⁽²⁾

Indicator codes were developed by UNSD (United Nations Statistical Division) for data transfer, tracking and other statistical purposes.

GOAL 9. BUILD RESILIENT INFRASTRUCTURE, PROMOTE INCLUSIVE

UNSD Indicator code	Target	Indicator
C090101	9.1 Develop quality, reliable, sustainable and resilient infrastructure, including regional and trans-border infrastructure, to support economic development and human well-being, with a focus on affordable and equitable access for all	9.1.2 Passenger and freight volumes, by mode of transport ⁽¹⁾
C090201	9.2 Promote inclusive and sustainable industrialisation and, by 2030, significantly raise industry's share of employment and gross domestic product, in line with national circumstances, and double its share in least developed countries	9.2.1 Manufacturing value added as a proportion of GDP and per capita (%)
C090202		9.2.2 Manufacturing employment as a proportion of total employment (%)
C090301	9.3 Increase the access of small-scale industrial and other enterprises, in particular in developing countries, to financial services, including affordable credit, and their integration into value chains and markets	9.3.1 Proportion of small-scale industries in total industry value added (%) ⁽²⁾
C090401	9.4 By 2030, upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes, with all countries taking action in accordance with their respective capabilities	9.4.1 CO ₂ emission per unit of value added (in tonnes) ⁽³⁾
C090501	9.5 Enhance scientific research, upgrade the technological capabilities of industrial sectors in all countries, in particular developing countries, including, by 2030, encouraging innovation and substantially increasing the number of research and development workers per 1 million people and public and private research and development spending	9.5.1 Research and development expenditure as a proportion (%) of GDP ⁽⁴⁾

*= Provisional data.

Indicator codes were developed by UNSD (United Statistical Nations Division) for data transfer, tracking and other statistical purposes.

(1) Number for road transport passengers is not available.

(2) First row data correspond to sections B-F of Nace Rev.2 (Statistical Classification of Economic Activities in the European Community) classification, while the second row data correspond to sections G-N (excluding section K) plus division S95 of the same classification. Data source is SBS (Structural Business Statistics). In year 2014 there is a break in the time series due to the application of a new methodology with the use of administrative data.

(3) Carbon dioxide emissions. Total - all NACE activities. Source: ELSTAT and Ministry of Environment and Energy.

(4) Source: ELSTAT. National Accounts.

(5) Value imputed by Eurostat or other agencies.

(6) The data is available but has been classified as confidential. They arise from the railway freight activity of 2 companies, one of which does not wish to publish its data.

09_50 SHARE OF BUSSES AND TRAINS IN TOTAL PASSENGER TRANSPORT (%)

09_30 R&D PERSONNEL - % OF ACTIVE POPULATION

10. Reduced inequalities

GOAL 10. REDUCE INEQUALITY WITHIN

UNSD Indicator Code	Target	Indicator
C100101	10.1 By 2030, progressively achieve and sustain income growth of the bottom 40 per cent of the population at a rate higher than the national average	10.1.1 Growth rates of household expenditure or income per capita among the bottom 40 per cent of the population and the total population (%) ⁽¹⁾

EUROSTAT Indicator code - Reduced inequalities	Indicator
sdg_10_10	Purchasing power adjusted GDP per capita (in purchasing power standards - pps)
sdg_10_30	Relative median at-risk-of-poverty gap - % distance to poverty threshold ⁽¹⁾
sdg_10_41	Income distribution ⁽¹⁾
sdg_10_50	Income share of the bottom 40 % of the population - % of national equivalised disposable income ⁽¹⁾

*= Provisional data.
 Indicator codes were developed by UNSD (United Nations Statistical Division) for data transfer, tracking and other statistical purposes.
 Data from Eurostat's database (source: ELSTAT and Hellenic Statistical System).
 (1) Source: ELSTAT. SILC (Survey on Income and Living Conditions).
 (2) The income quintile share ratio (S80/S20 ratio) measures relative inequality in income distribution, compares the total of equivalised disposable income received by the 20% of the country's population with the highest equivalised disposable income to that received by the 20% of the country's population with the lowest equivalised disposable income and is affected by the extreme values of income distribution.

AND AMONG COUNTRIES

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
	18.7	19.4	20.2	20.7	20.6	19.9	20.5	20.7	20.7	20.8

	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025
	19,100	19,700	20,200	20,800	18,900	21,200	24,000	*26,300	*27,400	*28,500
	31.9	30.3	29.1	27.0	27.3	26.4	23.8	22.5	23.3	21.7
S80/S20 ⁽²⁾	6.55	6.11	5.51	5.11	5.23	5.79	5.25	5.28	5.27	5.18
GINI coefficient ⁽³⁾	34.3	33.4	32.3	31.0	31.4	32.4	31.4	31.8	31.8	31.6
	18.7	19.4	20.2	20.7	20.6	19.9	20.5	20.7	20.7	20.8

(3) In order to depict income inequality more accurately, the Gini coefficient is complementarily used, which is not affected by the extreme values of income distribution and is defined as the relationship of cumulative shares of the population arranged according to the level of equivalised disposable income, to the cumulative share of the equivalised total disposable income received by them.

10_10 PURCHASING POWER ADJUSTED GDP PER CAPITA (in pps)

10_41 INCOME DISTRIBUTION (GINI coefficient)

11. Sustainable cities and communities

GOAL 11. MAKE CITIES AND HUMAN SETTLEMENTS

EUROSTAT Indicator code - Sustainable cities and communities	Indicator
sdg_11_11	Severe housing deprivation rate by poverty status (%) ^{(1) (2)}
sdg_11_20	Population living in households considering that they suffer from noise, by poverty status ^{(1) (2)}
sdg_11_40	People killed in road accidents per 100,000 persons ⁽³⁾
sdg_11_52	Premature deaths due to particulate matters (PM) 2.5 exposure (particulates < 2.5µm) ⁽⁴⁾
sdg_11_60	Recycling rate of municipal waste (%)

Data from Eurostat's database (source: ELSTAT and Hellenic Statistical System).

(1) Source: ELSTAT. SILC (Survey on Income and Living Conditions).

(2) From 2020 onwards, data are collected every three years.
