USER SATISFACTION SURVEY REPORT 2022

PIRAEUS, 2023

Introduction

The mission of the Hellenic Statistical Authority (ELSTAT) is to systematically develop, produce and disseminate official statistics of Greece, and to ensure and constantly improve the quality of the statistics of the Hellenic Statistical System (ELSS). ELSTAT pursues its mission by following the highest international statistical standards, and strictly adheres to the prescribed rules and fulfills its obligations in accordance with the European Statistics Code of Practice.

The following pages contain data on the number of users who submitted requests for data provision to the Statistical Data Dissemination Section, and the Library and Web Content Management Section of ELSTAT, in 2022, in combination with other parameters, such as the response rate to users' requests, the type of requested data and the dissemination mode of statistical information. The above information, for the year 2022, was collected by the use of an on-line questionnaire (User Satisfaction Questionnaire), which is attached at the end of this report. This questionnaire is addressed to all users who submit a request for data provision to the above Sections, while its completion is optional.

Purpose of the User Satisfaction Survey

The purpose of the User Satisfaction Survey is to:

- communicate with the users of official statistics, with the aim of further improving the quality of the produced statistical product of ELSTAT and the services provided by it,
- fully utilising the collected data, such as for example those relating to the type of statistical data requested and investigating new needs.

The survey collects information that covers the following main areas:

- users' category and their characteristics;
- type and statistical domain of requested data;
- dissemination mode of statistical data;
- degree of satisfaction of users' requests;
- frequency of submitting requests and using statistical data;
- frequency of visiting ELSTAT's website;
- degree of users' trust in the statistical data provided and the information posted on ELSTAT's website;
- degree of users' satisfaction as regards the services provided to them.

In the course of 2022, 137 User Satisfaction Questionnaires were filled in, in total, out of 1,667¹ users' requests submitted to the Statistical Data Dissemination Section and the Library and Web Content Management Section.

In order to have a more complete overview on the type of users requesting information, 10 basic categories are distinguished in the User Satisfaction Questionnaire: 1) Pupil/Student, 2) Teacher/Professor 3) Researcher, 4) Business, 5) Private user, 6) Public administration, 7) Press and other media, 8) Members of the parliamentary bodies, 9) International Organisation, 10) Other.

The statistical data are presented in 28 statistical domains (categories):

1) Fishery, 2) Employment – Labour cost and remuneration, 3) Population-Housing Census, 4) Industry-Manufacture-Mines, 5) Agriculture, 6) Forestry, 7) Price indices, 8) Demography, 9) Public Finance, 10) Justice, 11) National Accounts, 12) Income — Living conditions of households, 13) Education, 14) Domestic trade (retail - wholesale), 15) External and international trade, 16) Energy, 17) Social protection and social security, 18) Livestock 19) Transport – Communication, 20) Business Register, 21) Building activity - Construction, 22) Environment, 23) Culture, 24) Tourism, 25) Health, 26) ICT use 27) Time use and 28) Other.

This Report gives an overview, in the form of tables and graphs, of:

- the distribution of total users' requests, by statistical domain of the requested data (Table 1 and Graph 1);
- the most important findings of the Survey, referring to the twelve-month period January-December 2022.

¹ This number does not include 407 requests of users, who were directly addressed to the International Transactions Statistics Section, the Population and Migration Statistics Section and the Cartography and Geospatial Data Section for data provision (195, 98 and 114 requests, respectively) and did not participate in the User Satisfaction Survey.
